x Delayed childbearing in affluent countries and the financial crisis of the Y-generation have contributed to the dramatic decline in birth rate. Social oocyte freezing (SOF) has fuelled the imagination of patients and doctors to offer it as a solution to single, presumably fertile, women to preserve their fertility potential by egg banking at an early age.

Biologically speaking, human development begins after the joining of a sperm and an egg. Around 100 years ago, the German biologist Theodor Boveri brilliantly summarised the unique contributions of each gamete, stating: "The ripe egg possesses all of the elements necessary for development save an active division-center. The sperm, on the other hand, possesses such a center, but lacks the ...
