How To Use Your Camera

Shutter speed allows you to freeze any motion in a picture (action shot) or to blur any motion in a picture (waterfall). Keep in mind, you can hold your camera for anything that falls above 1/50. If you reduce your shutter speed below 1/50 then you will need to use a tripod for that picture so it won't be blurry. This can vary greatly from camera to camera, so play around with your camera to see when you need to use a tripod.

Learn How To Use Your DSLR Camera With This Easy ...

Centre-weighted. Spot metering – The camera will use a very small area of the scene, typically a small circle in the centre of the viewfinder that totals approximately 5% of the viewfinder area. It will make the assessment of dark/light tones in this area and expose the entire scene to 18% grey, from that assessment.
