I have worked with all of these except the for the Rankine turbine and thermionic generators. All

engines have advantages and disadvantages. For use with my heliostats I have chosen either the Steam Rankine piston engine or the Rankine rotary expansion engine using propane as the working fluid.

The variable valve timing camshaft actuators may stick due to dirty engine oil or a faulty control solenoid. A sticking actuator may cause a rough idle and the check engine light to illuminate. Our technicians tell us the engine oil should be checked to make sure it is clean and at the proper level before replacing any parts to correct this concern.
