### **How do I tell the Hot wire from neutral wire? | Yahoo Answers**

End-of-Run Outlet. Power comes from the service panel along the black (hot) wire through other outlets, switches, and light fixtures on the circuit and begins its return to the source through the white (neutral) wire attached to this outlet. The black wire attaches to a brass terminal; the white wire, to a silver terminal.

### **How to Identify Wiring | DIY**

The stereotypical "hot-wire" job that is seen in the movies usually involves gaining access to some of the wiring under the dash and then shorting two wires together. At a very high (and naive) level, this represents bypassing the key switch in the ignition. However, if this was attempted in modern vehicles,...
