Remove the pan from the solid disk if you want the cooking to stop. Gas Burners Regular or sealed

Flames heat the pans directly. Pan flatness is not critical to cooking results, but gas burners use pans should be well balanced. Gas burners heat the pan right away and change either LP gas heat settings right away.

How to get the best from Your Range - geappliances.com

There is a fan running and I am not using the gas & electric cookers. Most of our modern Hotpoint appliances are fitted with a cooling fan to prevent the controls getting too hot. The fan can run for up to 30 minutes after the oven has been switched off for safety reasons. During this period the fan may switch off and on, this is perfectly normal.

Hotpoint Service | Gas And Electric Cooker Repairs

The nice thing about gas oven repair is that there aren't a whole lot of moving parts, so wear and tear is a relatively minor consideration. In diagnosing them, you basically just have to learn how the system is supposed to work, then watch it for a while to see which part of the system has stopped working.. The different systems are detailed in the following sections.
