Honda Gxh 50 50cc Engine

Honda's GC and GS engines use the world's first small engine internal timing belt, designed to last the lifetime of the engine. Small engine timing belts are usually external and are subject to wear caused by dirt. Honda's internal timing belt runs in oil, eliminating the need for conventional drive gears. This design:

Honda GXH50 50cc 4-stroke fix and run.

Tightened springs dont increase compression - what they can do is reduce valve bounce/float at top end which means the engine will rev higher without loosing power - the tradeoff is possibly higher mechanical wear. An example is the engine used in the Humber Sceptre and the Hillman Minx. Identical engines apart from the head.
