My friend got his engine re-bored and pistons matched at a reputable shop. People have complained about forged pistons slapping when the engine is cold. This done even from a reputable Subaru tuning shop here in Montreal. So forged pistons are prone to slapping. My OEM pistons I got were from the stealership. I matched the letters on the block.

The Subaru EJ engine is a series of four-stroke automotive engines manufactured by Subaru. They were introduced in 1989, intended to succeed the previous Subaru EA engine. The EJ series is the mainstay of Subaru's engine line, with all engines of this series being 16-valve horizontal flat-fours, with configurations available for single, or double-overhead camshaft arrangements (SOHC or DOHC).

So, when a timing belt is set in the incorrect position (or wears out), valves can be smashed by the pistons and severe engine damage occurs. With most cars, timing is set to top dead center on number 1 piston. But on a Subaru with their funny horizontal boxer engine, it is set at mid-stroke.

### **How to set timing (timing belt change) on a Subaru SOHC EJ25**

In this engine, the failure allows external coolant leakage, which can also result in over heating and engine failure. 4. Subaru recognized the HG problem in the 2.5 L SOC engines and in April 2002 implemented a "Service Campaign" to "fix" the problem, which Subaru claims only occurred in 1999 to 2002 model years.

### **PISTON AND RING - Manley Performance**

Had a 2005 outback that the engine locked up on. Lucky us, we had a "core" (that part is a loooooong story). So I bust out the old engine and send the heads off. They rebuild the heads and mill em and send em back. I put them on the "new" engine. I get the timing belt installed. Go to

turn the engine to make sure the timing marks still line up.
