You didn't mention what this engine powers, Have you checked the flywheel key ? Does it kick back if you shut it down then try to re-start it or does it have to sit a little bit before it kicks back ? Alignment of the timing marks is all that's needed, The compression release if OK will function properly doing that.

Honda GX160 compression release help ?? | LawnSite

In the next cycle, the cylinder fires for whatever reason (detonation, etc) out of sequence (pre-compression) and drives it into counter rotation. If it happens on rare ocassion, call it a fluke. If it happens regularly (as you have described), see a small engine mechanic. FWIW, the GX390 is a great motor.

In this video I find a slightly misplaced flywheel key is the problem to making the pull cord kickback. It may have been a pattern part that didn't quite fit.

Lawnmower Kickback Problem

it is a honda gc 190 engine on a cub cadet tiller by Manage My Life. April 1st, 2012. Comment . 0 votes Thank you for your question. I am sorry you are having a problem with the tiller. Usually when an engine kicks back that hard, it is because the valves are out of adjustment. The engine has a compression release that aids in starting the engine.

when pulling start cord it jerks back so hard almost break ...

So I'm working on a real Honda GX390. It doesnt have any spark, or should I say intermittent spark. When it does start, it runs fine for a little while, usually less than a minute, then just suddenly dies. Check spark, none. Oil level sensor is disconnected, replaced the coil with a genuine Honda part. Still no spark at times.
