Tessellations can also be done using 2 or more types of regular polygons. The arrangement of polygons around every vertex point must be identical in both semi-regular and regular tessellations. A vertex point is where all the polygons meet. Go around a vertex point clockwise and name the polygons as you go.

Edge Tools. Complete Graph draws a complete graph using the vertices in the workspace. It erases all existing edges and edge properties, arranges the vertices in a circle, and then draws one edge between every pair of vertices. Weight sets the weight of an edge or set of edges. The default weight of all edges is 0.
