Intermediate Accounting 6th Edition Chap

The preferred procedure for computing the amortization of a discount or premium. Under this method, companies compute bond interest expense (revenue) at the beginning of the period by the effective-interest rate and then subtract bond interest paid (calculated as the face amount of the bonds times the stated interest rate); the result is the amortization amount.

Some situations in which present value measures are used in accounting include: (a) Notes receivable and payable—these involve single sums (the face amounts) and may involve annuities, if there are periodic interest payments. (b) Leases—involve measurement of assets and obligations, which are based on the present value
